

RESCUE ORION™

An Experiential Learning Program by Eagles Flight Asia

Rescue Orion utilizes virtual technology to aid engagement and maintain participation. Gemini 1 crew members use screen sharing, an interactive game map, and live annotation tools to manage the mission's resources and interactively fly the Gemini 1 spacecraft across the galaxy and back to help save the crew of the space station Orion.

After the allotted mission length has expired the experienced moderators use each crew's new-found convictions, based on how successful or unsuccessful their missions were to facilitate a powerful debrief and discussion to help participants understand their shortcomings, suggest corrective behavior using easy to understand models and build on successes to create a more cohesive and stronger team back on the job.

The Outcome:

While we're big on fun, we also know that your event needs to make a real impact. Here are just a few of the things that attendees will walk away confidently able to do:

- Focus on how your actions and role contribute to the business outcomes
- Effectively prioritize issues, anticipate consequences, and tackle with urgency and intensity
- Strategically use all the information and resources at your disposal
- Utilize effective planning so that actions can be made with purpose and confidence
- Be prepared with your best options and approaches to present
